

# Building Energy Exchange

## Industry Leadership Council

Leading energy efficiency progress in New York's built environment.

### mission

The Industry Leadership Council is a select group of green building leaders that represent major public, private, and NGO organizations and assist the Building Energy Exchange (BE-Ex) in our mission to accelerate the transition to healthy, comfortable, and energy efficient buildings.

The council advises our staff on strategic and technical questions related to our work. Members are also invited to attend special events and exclusive opportunities to interface with one another and other key figures in our industry.

### commitment & expectations

The Industry Leadership Council will provide our organization with direct access to an extensive pool of knowledge, as we make decisions about the overall direction of BE-Ex programs and encounter specific technical questions in our work.

Participation will involve very limited commitment of time or resources, with most communication occurring over email and utilizing quick tools like online surveys. The advice and perspectives provided by the Industry Leadership Council will improve BE-Ex's strategic decision making, and ensure the organization is connected to the current schools of thought in our rapidly evolving industry.

To support this community of leaders, BE-Ex will organize two to three special networking and knowledge sharing sessions per year, exclusively for the Industry Leadership Council. These gatherings will feature leading figures in our industry and may include short briefings on upcoming BE-Ex projects. Sessions may include authors discussing recent publications, private sector leaders, or high level policymakers and political representatives. For most events, each council member will be offered guest passes to distribute to colleagues or clients.

Membership in the Industry Leadership Council is limited to members of our board of directors and nominated senior representatives from each of our supporting organizations. Members of the council will be listed prominently on our website and are welcome to identify themselves as such.
