Future Housing Initiative Underwriting Standards for Low-Carbon Housing

Advisory Group Members

This group of leading industry professionals guides our work on the NYSERDA-funded *Underwriting Standards for Low-Carbon Housing* project as we develop a database of actual energy performance data from low-carbon multifamily properties. They also provide input on the utility cost benchmarks that can be used for underwriting low-carbon multifamily buildings, based on that energy performance data.

1. **Amy Brusiloff**, Senior Vice President, Bank of America
2. **Ryan Cassidy**, Director of Sustainability & Construction, Riseboro Community Partnership
3. **Rebecca Hudson**, Manager, ENERGY STAR Multifamily High Rise Program, EPA
4. **Joshua Kace**, Program Manager of Building Energy Efficiency and Decarbonization, Lawrence Berkeley National Lab (LBNL)
