

The Future of Multifamily:

Positioning Condos and Co-ops for Success in DC and NYC

Join the Building Energy Exchange and the Building Innovation Hub for the first event in the Future of Multifamily series – Positioning Condos and Co-ops for Success in DC and NYC. This virtual webinar will overview the current BPS landscape in both cities and how condos and co-ops are preparing for compliance. After brief presentations from real case studies in NYC and DC, participants will hear from service providers and condo board members in a moderated discussion.

2024 Greenbuild and Mass Timber+

How high-performance building hubs turn aspiration into execution

This session will explore how high-performance building hubs are developing across the U.S., the various programs they provide, and how everyone can engage and benefit. We will talk to three Hub Directors that are in various stages of implementation and policy development in their jurisdictions and learn the answers to the following questions: Who does the Hub benefit? How do I get a Hub started in my region, particularly if we have not implemented policy? What funding is there to create/maintain a hub in a jurisdiction? Where are the current Hubs and how can I plug in?

speakers

Rich Freeh, Executive Director, Green Building United

Theresa Backhus, Director, Building Innovation Hub, Institute for Market Transformation

Katie Kaluzny, Deputy Director, Illinois Green Alliance/Building Energy Resource Hub

Katie Schwamb, Director, Educational Resources, Building Energy Exchange
